

WHAT IS CLAIMED:

1. A mouthpiece, barrel and reed table comprising:  
a body having a mouthpiece and barrel section having  
at least one circular bore for supporting a wind instrument  
barrel and at least one circular extension for supporting a  
5 wind instrument mouthpiece; and having a reed table section  
having a tray portion having a reed area.

2. The mouthpiece, barrel and reed table as recited  
in claim 1 wherein said reed section area includes a glass  
plate.

3. The mouthpiece, barrel and reed table as recited  
in claim 2 and wherein said reed section area has an upper  
surface and wherein said glass plate has a side at least  
the same height as said upper surface.

4. The mouthpiece, barrel and reed table as recited  
in claim 1 wherein said reed section area includes a upward  
sloped surface, in a direction near side of said  
mouthpiece, barrel and reed table, having a slope of from  
about 0.02 to about 0.03.

5. The mouthpiece, barrel and reed table as recited

in claim 1 and wherein said at least one circular bore further comprises a plurality of circular bores.

6. The mouthpiece, barrel and reed table as recited in claim 1 and wherein said at least one circular extension further comprises a plurality of circular extensions.

7. The mouthpiece, barrel and reed table as recited in claim 1 and wherein said at least one circular extension further comprises friction material attached to said at least one circular extension for firmly engaging a barrel.

8. The mouthpiece, barrel and reed table as recited in claim 1 and wherein said body has a plurality of sides and wherein a line from an axis of said at least one circular extension to an axis of said at least one circular  
5 bore is angled with respect to at least one of said plurality of sides.

9. The mouthpiece, barrel and reed table as recited in claim 1 and wherein said body has a base member which includes said reed area, and an upper member which includes said mouthpiece and barrel section.
